RUMI LIBRARY

ISLAMIC UNIVERSITY OF SCIENCE & TECHNOLOGY

1-University Avenue Awantipora, Pulwama J&K-192122

Circular

It is for the information of all faculty members, research scholars, and students that the Rumi Library has successfully implemented the **Refread eLibrary** platform to facilitate seamless access to the University's subscribed electronic resources from off-campus locations.

The Refread eLibrary provides a unified interface for metasearch and remote access, enabling users to conveniently access e-journals, e-books, databases, and other scholarly resources anytime and from anywhere.

All users are encouraged to make optimal use of this facility for academic and research purposes. The Refread eLibrary can be accessed both via the web and through mobile applications (Android/iOS).

To access the platform, users are required to register/sign up using their institutional credentials. Login details will be shared with users on their registered email IDs upon successful registration. Detailed guidelines for registration and usage are available on the library website and may also be obtained from the Library Helpdesk.

The Refread eLibrary interface is available in 10 different languages to facilitate ease of access and usability for users from diverse linguistic backgrounds.

In case of any difficulty or for further assistance, users may contact the Rumi Library.

This initiative aims to enhance access to digital resources and support the academic and research needs of the University community.

Introduction

Refread has built the RUMI eLibrary (<https://iust.refread.com/#/home>) to provide you a single point access of millions of eResources in the most simplified manner. Our aim is to save you time and effort by aggregating all library resources and everything relevant on the web for the subjects of your interest.

RUMI eLibrary solves two main problems:

Unify 100s of platforms

Scholars need not waste time and effort in visiting and searching a multitude of subscribed publisher platforms, and internal repositories for the relevant content.

Diverse Information Needs

The platform serves diverse information needs which go beyond just learning content. Expert talks, literature, A/V lectures, audio books, etc make RUMI eLibrary an engaging information hub.

Benefits

- **Over continuously growing collection with 3,36,000+ Full Text Publications including eBooks, eJournals, Databases, Thesis and Videos,**
- Engaging Info and Literary Services comprising of Expert Talks, Leisure Reading, Other important links.
- **Discover latest Research Articles and News Articles** from all subscribed publishers and relevant open access platforms
- **Keep up with headlines from 2000+ News Publications**
- Subscribed Publishers like Cambridge University Press, Taylor & Francis, New Age, Sage, Elgar Online, McGraw Hill, World Scientific, DELNET, Elsevier, RefWorks, Zotero.
- **Access Full Text EVERYWHERE, 24x7** via an inbuilt remote access solution
- Also available as an app on Android Playstore and iOS App store
- Save favorite eResources in Reading List, export citations, and share resources with peers
- Keep up with the latest additions in the eLibrary

Search & Browse

Easy Browsing

Basic Search

Advance Search

Easy Browsing

1. Browsing eResources

All Scholarly resources arranged by Discipline, Publisher, Format or Topic Guides

a) Browse by Categories - Click on any subjects to list eResources

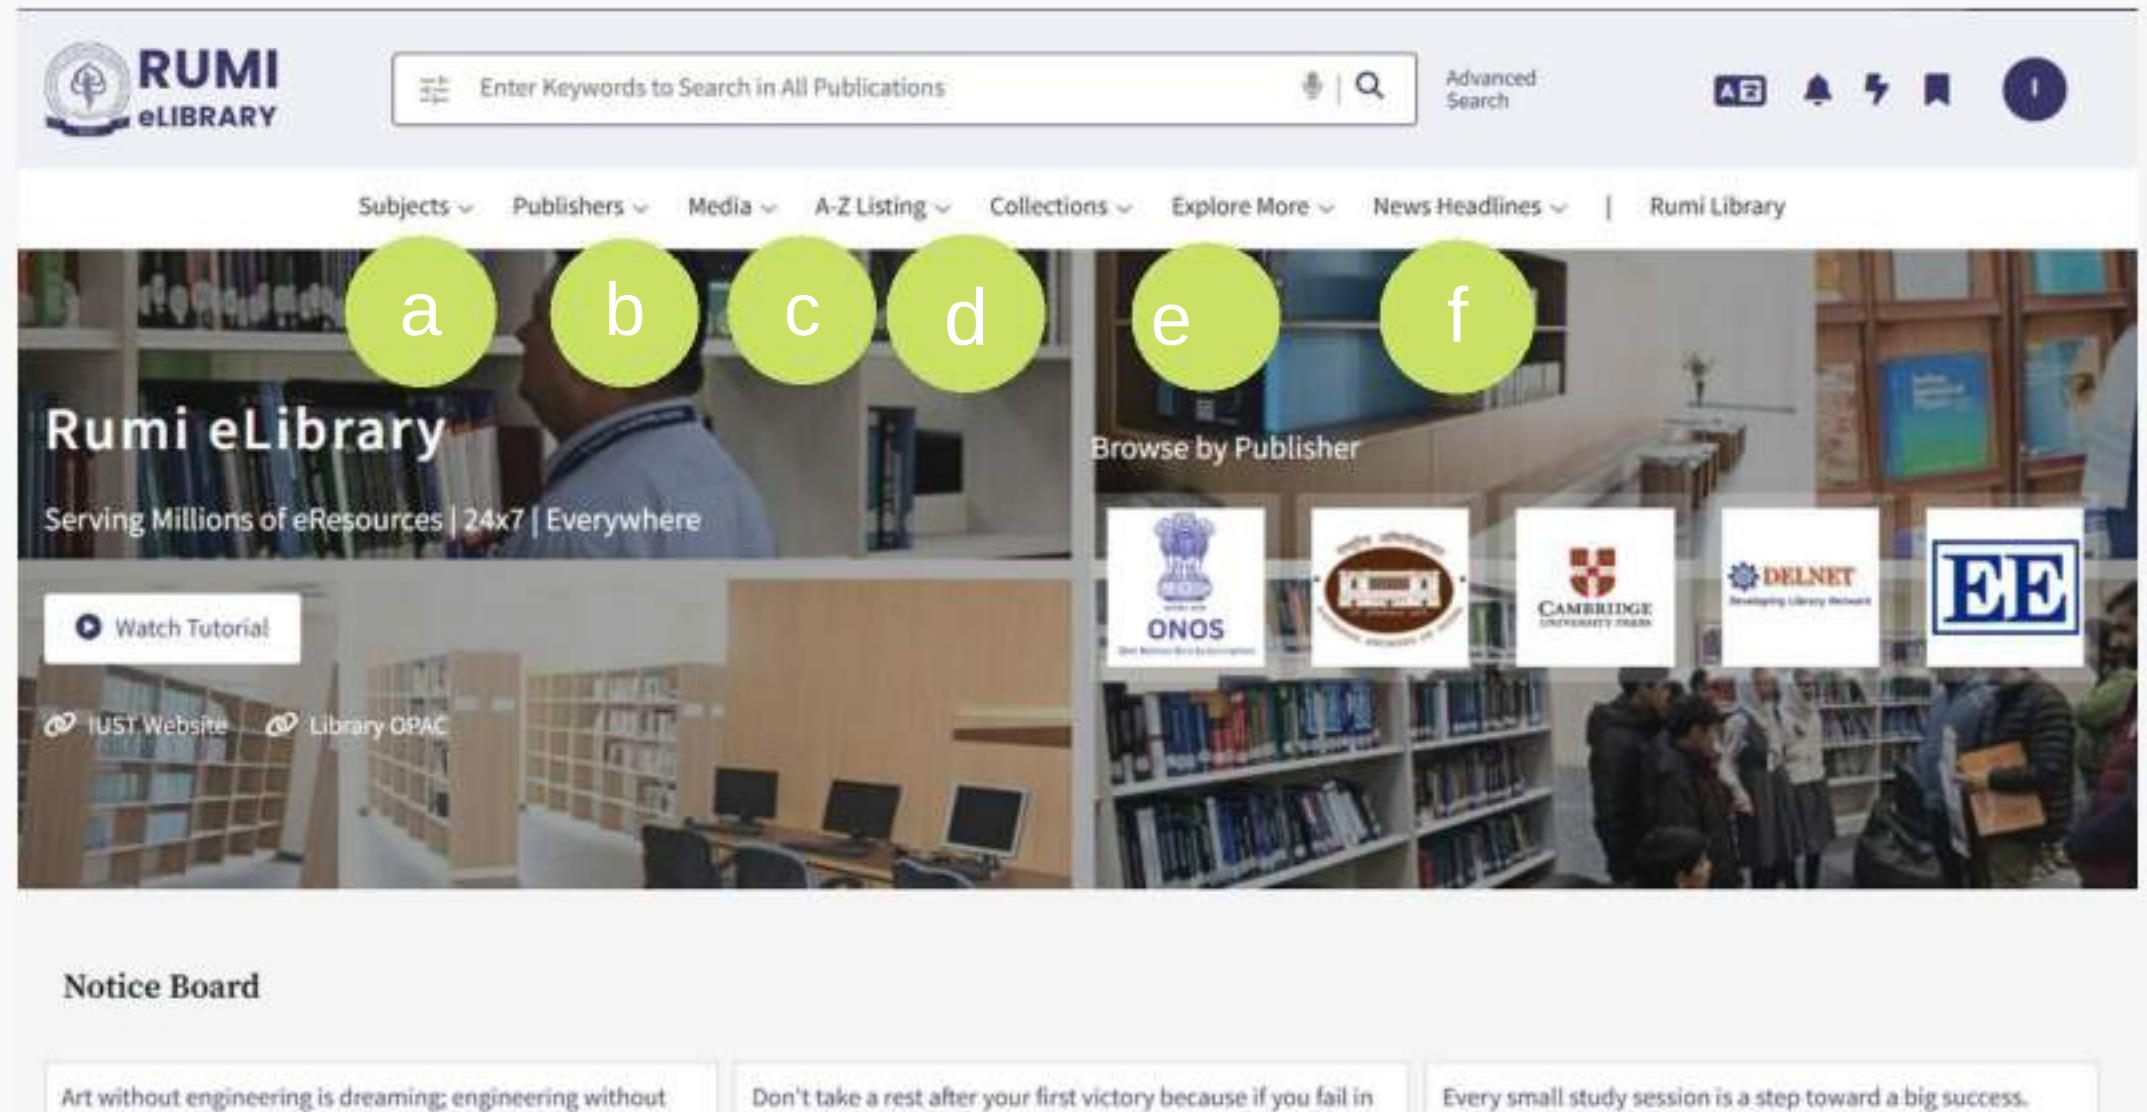

b) Browse by Publisher- Click on Publisher Names to list eResources by Publisher

c) Browse by Media- Click on the format (journal, eBook) to list documents by type of media.

d) Browse A-Z- Click on the A-Z letter to list publications starting with the letter sorted in alphabetical order.

e) News Headlines- Click on News Headlines to access all the new clippings updated by the library team

f) Recent Searches-Through Recent searches option you can look into all your recent searches on the eLibrary.

Basic Search

1. Keyword Search in Bar

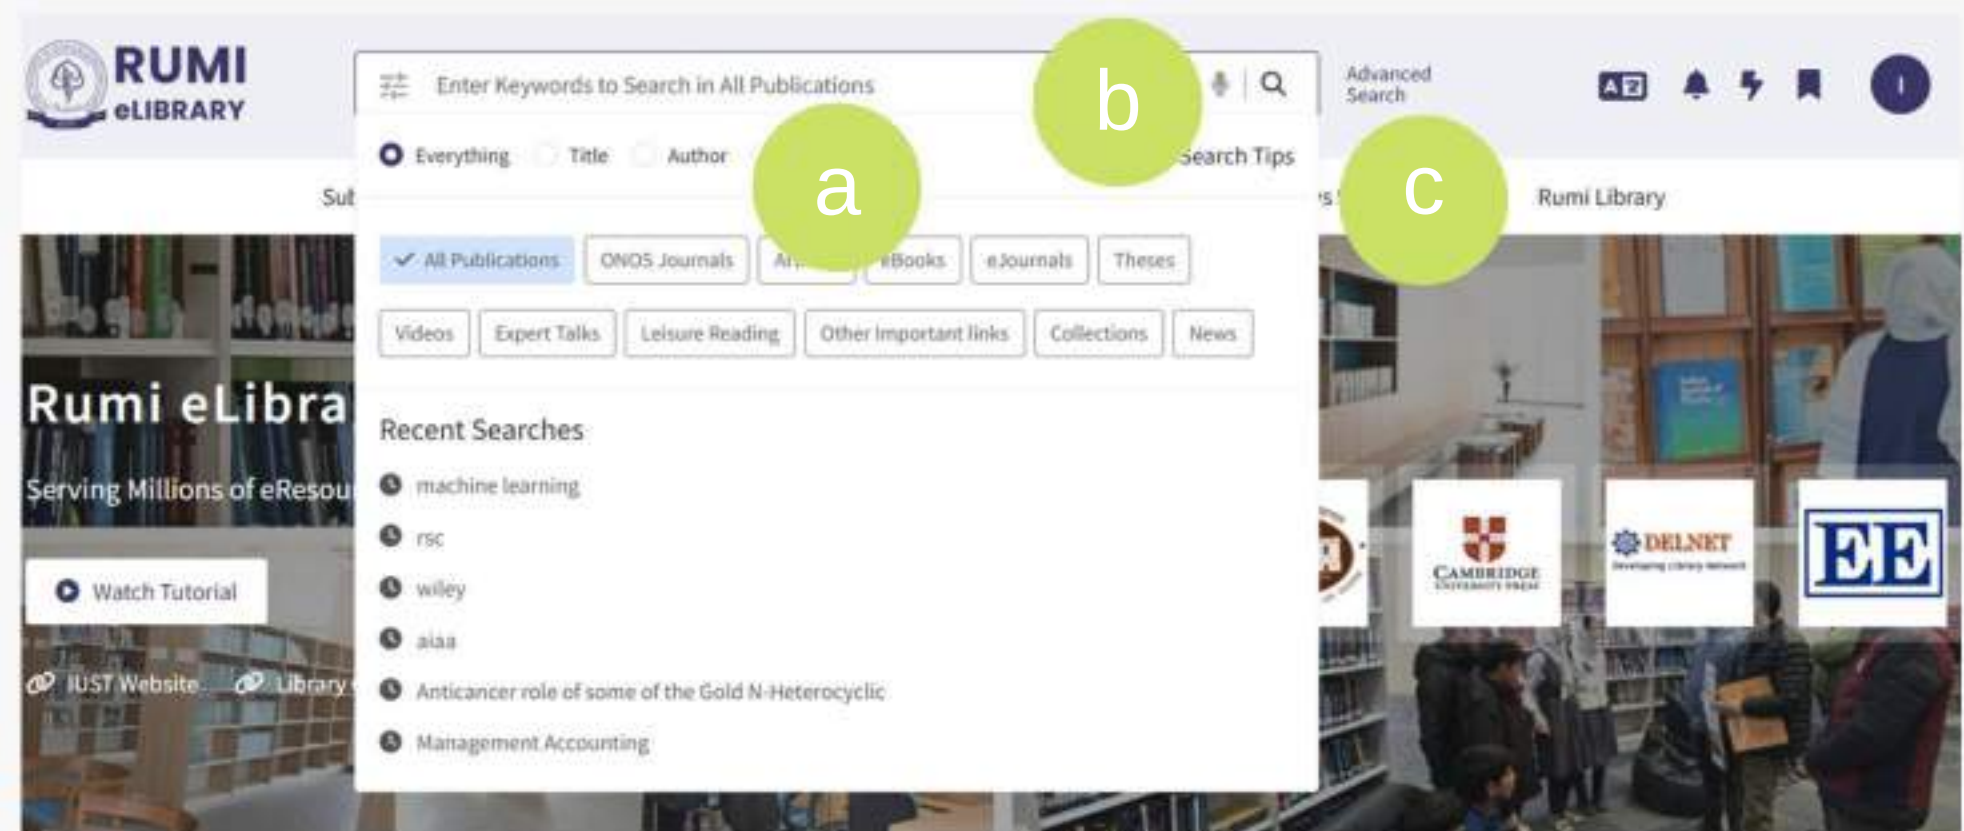

Available on the Home page banner and in the header on every view.

a) Just like Google, you can use Boolean search operators (expressions) to give context to your search query and get more relevant results

- **Use quotes ("")**, for exact/phrase matching
- **Use AND between keywords** for results that must contain both the keywords (in any order)
- **Use OR between keywords** for results that contain either (or both) keywords

b) Refread gives you a Universal Search Mechanism to find catalog, research or news articles and content from explore more sections in a single click.

c) Click on the Wrench Icon next to the Basic Search Bar to Open **Advanced Search Form**

Advance Search

1. eCatalog

Click on the wrench icon next to Search Bar to open Advance Search Form. Advance search is best suited to perform complex queries with multiple queries in multiple fields. Search across Publications in the RUMI collection. 'eCatalog' form will search in all RUMI Publications

a) Chose 'Fields' like Title, Author or publisher for localizing your search query.

b) Use Boolean expressions to define relationship between different keywords. Use quotes (""), for exact/phrase matching. Use AND between keywords for results that must contain both keywords (narrows your result set). Use OR between keywords for results that contain either or both keywords (Broadens your result set).

c) Limit by Year of Publication- Add the 'From' and 'To' Year of Publication in YYYY format to narrow your results to that period.

d) Limit by Accessibility - 'Open Access' accessibility limiter will narrow your results to only Open Access content curated by Refread. 'Subscribed' Limiter will narrow your result set to show only publications that have been subscribed by your library. 'Available in Library' limiter will show print publications (books, theses) available for reading/checkout from the library.

e) Limit by Media Type - Chose one or more type of media to narrow the result set to your preferred formats.

2. Use Boolean expressions to define the relationship between different keywords. Use quotes (""), for exact/phrase matching. Use AND between keywords for results that must contain both keywords (narrows your result set). Use OR between keywords for results that contain either or both keywords (Broadens your result set).

Limit by Year of Publication

Add the 'From' and 'To' Year of Publication in YYYY format to narrow your results to that period.

Limit by Accessibility

1. 'Open Access' accessibility limiter will narrow your results to only Open Access content curated by Refread.
2. 'Subscribed' Limiter will narrow your result set to show only publications that have been subscribed by your library.
3. 'Available in Library' limiter will show print publications (books, theses) available for reading/checkout from the library.

Limit by Media Type

Chose one or more type of media to narrow the result set to your preferred formats.

Advance Search

2. Research Articles

'Research Articles' form will search for latest Research or News Articles in Publications either subscribed by RUMI eLibrary or top rated open access publishers. Article search is performed on the publisher's website on real-time basis. The experience, relevancy and result set received depends on the publishers' own search algorithm and website performance.

a) Chose 'Fields' like Title, Author or publisher for localizing your search query.

b) Use Boolean expressions to define relationship between different keywords. Use quotes (""), for exact/phrase matching. Use AND between keywords for results that must contain both keywords (narrows your result set). Use OR between keywords for results that contain either or both keywords (Broadens your result set).

1. 'Open Access' accessibility limiter will narrow your results to only Open Access content curated by Refread.
2. 'Subscribed' Limiter will narrow your result set to show only publications that have been subscribed by your library.
3. 'Available in Library' limiter will show print publications (books, theses) available for reading/checkout from the library.

Limit by Media Type

Some publishers do not support Phrase search (""). Hence, applying this expression to your search query may not bring results from such publishers.

Advance Search

2. Research Articles

c) Limit by Year of Publication - Add the 'From' and 'To' Year of Publication in YYYY format to narrow your results to that period. **Some publishers do not support limitation by Year of Publication. Hence, applying this filter may not bring results from some of your subscribed publishers.**

d) Limit by Accessibility - You can limit search results to show only those articles for which you have full text access (open access + subscribed resources).

e) Limit by Sources - Chose one or more sources (publishers, aggregators or open access platforms) to target your search.

The screenshot shows the 'Advanced Search' interface of the Rumi Library. At the top, there are navigation links for 'Subjects', 'Publishers', 'Media', and 'A-Z Listing', along with the library name 'Rumi Library'. Below this, the 'Advanced Search' section is divided into three tabs: 'eCatalog', 'Article', and 'DOI'. The 'Article' tab is selected. The main search area is titled 'Enter Keywords and Select Fields' and contains three rows of search input fields. Each row has a dropdown menu for 'Article Title', a text input for 'Enter Keywords To Search', and a dropdown for 'AND'. Below this is the 'Year of Publication' section, which includes two text input fields for 'From Year (YYYY)' and 'To Year (YYYY)'. To the right of these fields is a green circle with the letter 'e'. Below the year fields is the 'Select Sources' section, which includes a checkbox for 'Select / Unselect All' and four radio button options: 'All (Default)', 'Subscribed', 'Open Access', and 'My Favourites'. A green circle with the letter 'd' is positioned to the left of the 'Select Sources' section. The right side of the screenshot contains a text box with instructions for advanced search, including sections for 'Advanced Search for Research or News Articles', 'Enter Keywords, Choose Fields and Use Expressions', 'Limit by Year of Publication', and 'Limit by Accessibility'.

Advanced Search for Research or News Articles :

Enter Keywords, Choose Fields and Use Expressions

1. Choose 'Fields' like Title, Author or publisher for localizing your search query.
2. Use Boolean expressions to define relationship between different keywords. Use quotes (""), for exact/phrase matching, Use AND between keywords for results that must contain both keywords (narrows your result set). Use OR between keywords for results that contain either or both keywords (Broadens your result set).

Limit by Year of Publication

Add the 'From' and 'To' Year of Publication in YYYY format to narrow your results to that period.

Limit by Accessibility

1. 'Open Access' accessibility limiter will narrow your results to only Open Access content curated by Refread.
2. 'Subscribed' Limiter will narrow your result set to show only publications that have been subscribed by your library.

Machine Learning Refined

Machine Learning with Applications

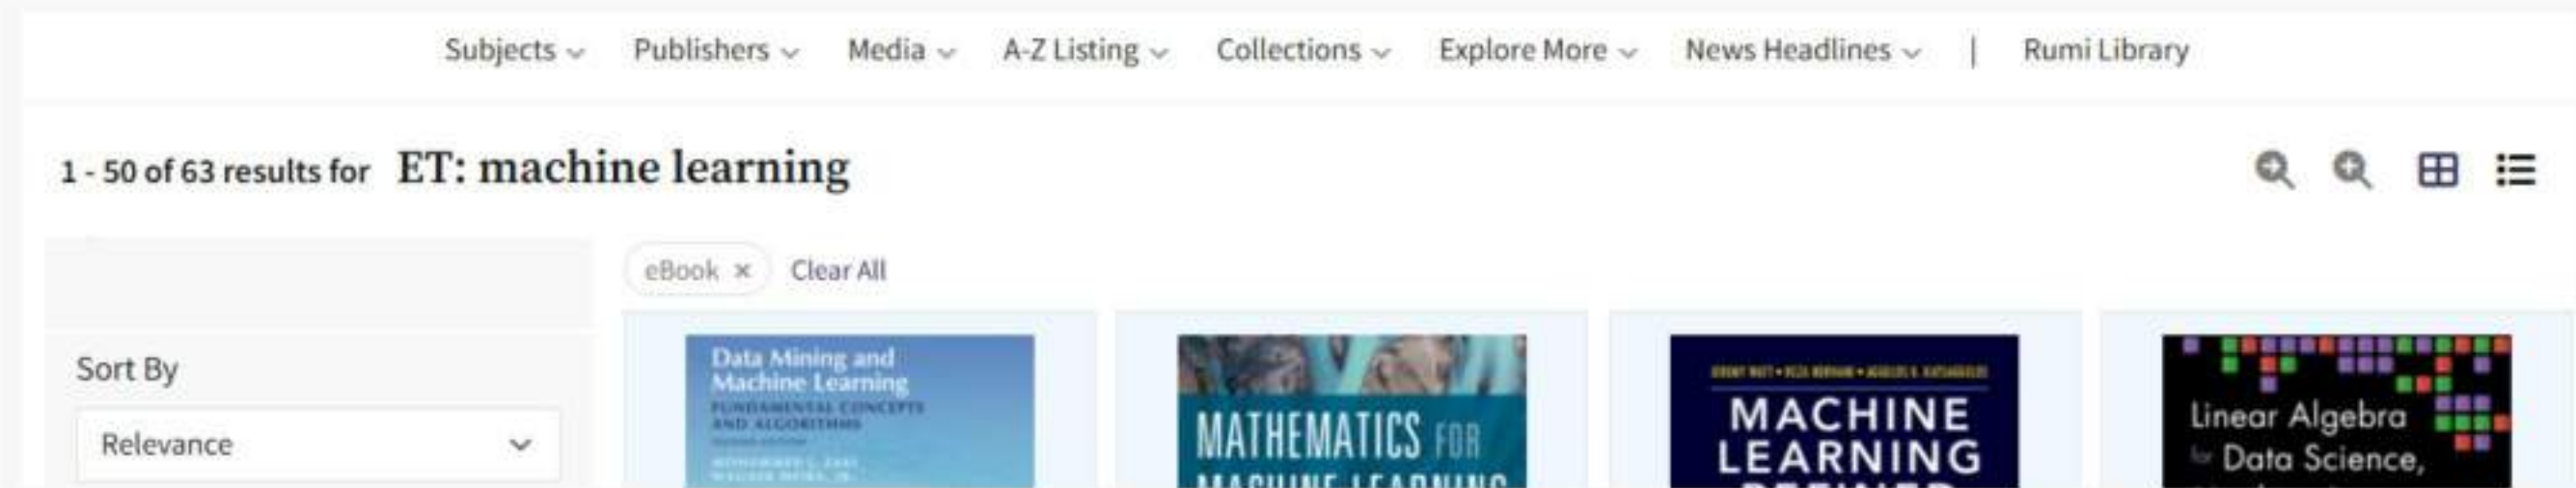

1. Results Summary

a) All Browse links in 'eResources' lead you to eCatalog Results. eCatalog Results show you all Publications included in the eLibrary. Results from Basic Search also lead you to eCatalog Results by default. You can choose to see RESEARCH ARTICLES or other content by clicking on MORE tab. You can see the Total Result count along with the tab.

b) Result view - You can opt to see search results in two formats: Grid and List View.

c) Instead of writing complex search queries again and again, you can save the search query. Click on the Search+ icon to save the search query to your reading list.

Filters and Sorting

Refine results by performing filters on:

- Subject - Drill down by Subject Category. This filter helps you drill down by 3 subject levels (Ex: Technology > Electrical Engineering > Power Distribution Systems)
- Publisher
- Author
- Media - Drill down to list results of a single document type (eBook, Journal, Video, Thesis)
- Access - Helps you filter content by access type:
 - Open Access - eResources added by Refread. Available to you both within and outside the campus (after login) for free.
 - Subscribed - Lists eResources subscribed by the library. These are generally the e content purchased by your library from top publishers (like Pressreader)
- Year - Filter by Year of Publication. Year filter is sorted in reverse chronological order.
- Search Within - Enter a keyword to further filter down results having 'exact' matching keywords in the title

Removing Filters - The applied filters are shown at the top, just in case you wish to remove the filter and go back to original result set.

Sorting - To change the order of the results. By default, results are displayed by relevancy. You can sort by:

- Title - To list records in alphabetic order
- Year - To list records in reverse chronological order (latest shown first)

Full Text Access

Behaviour of the Read/Watch Button for full text access is governed by the following policy:

a) Open Access Publications - Full text resource is available both within and outside the campus

b) Subscribed Publications - Full Text is available only if your lab has a subscription for the resource. If not available, you can request for the eBook or Research Article using "Request an Item" form

For Off Campus Access:

1. Login is Mandatory for full text access
2. You must have Off Campus rights activated on your account by the library
3. You can only download 100 eResources in a day from outside the campus
4. Your off campus rights may expire after a period and might require reactivation by the staff. This is to prevent misuse of copyright protected resources.

If you get error while trying to access subscribed resources from outside the campus, please write to support@refread.com in for assistance.

Personalization Features

Reading List Folders

Webhook

Reading List Folders

You can save eResources in reading list for future reference and organize them in folders of your choice. To save:

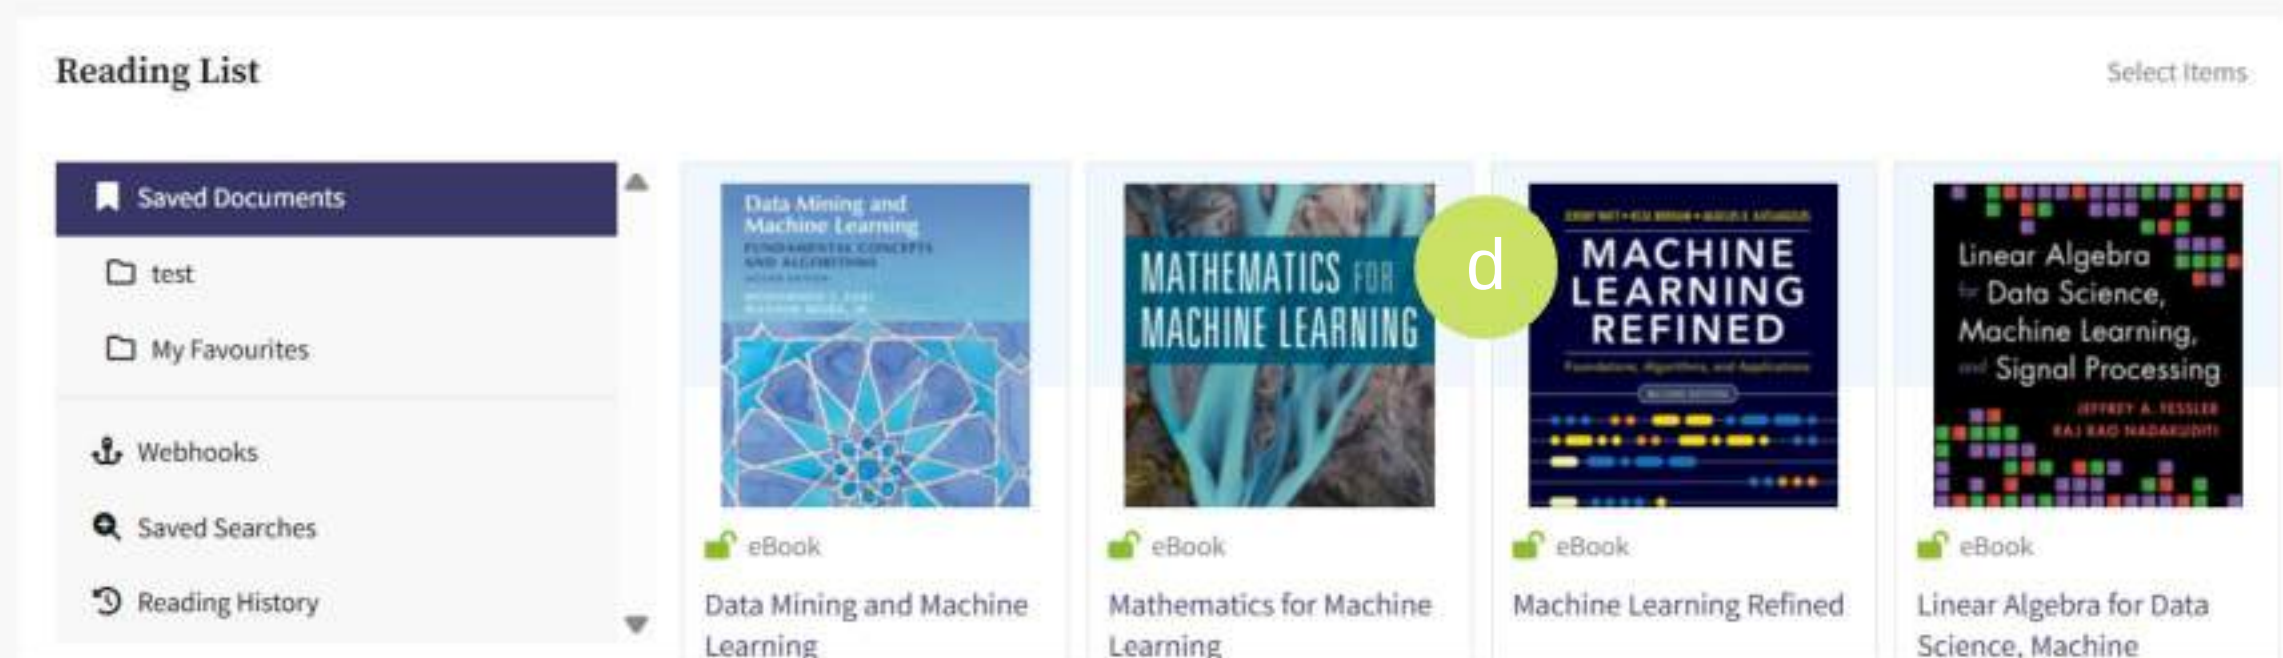

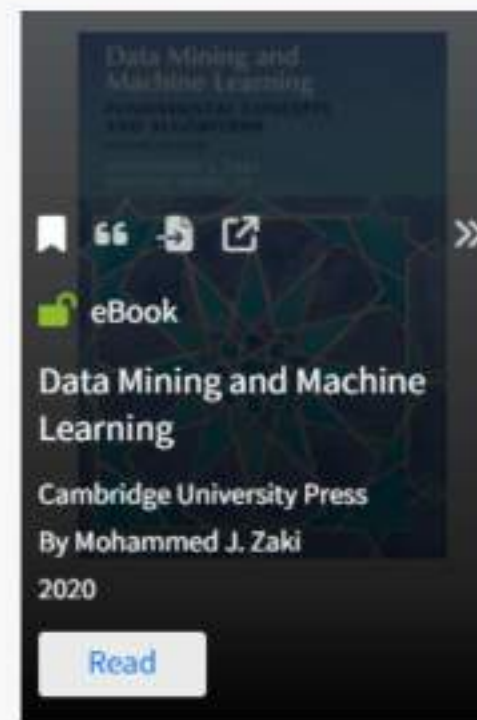

a) click on the "Add to Reading List" button available on each search result

b) Select previously created folders or create a new destination folder

c) After saving, you can find the folders and save documents in your Reading List

d) Reading List also shows you all resources you have read in past sorted by date of activity (latest to oldest) in the 'Reading History' Folder

Instead of typing in long search queries, you can save them and execute the search from 'Saved Searches' folder

Personalization Features

Reading List Folders

Webhook

Reading List Folders

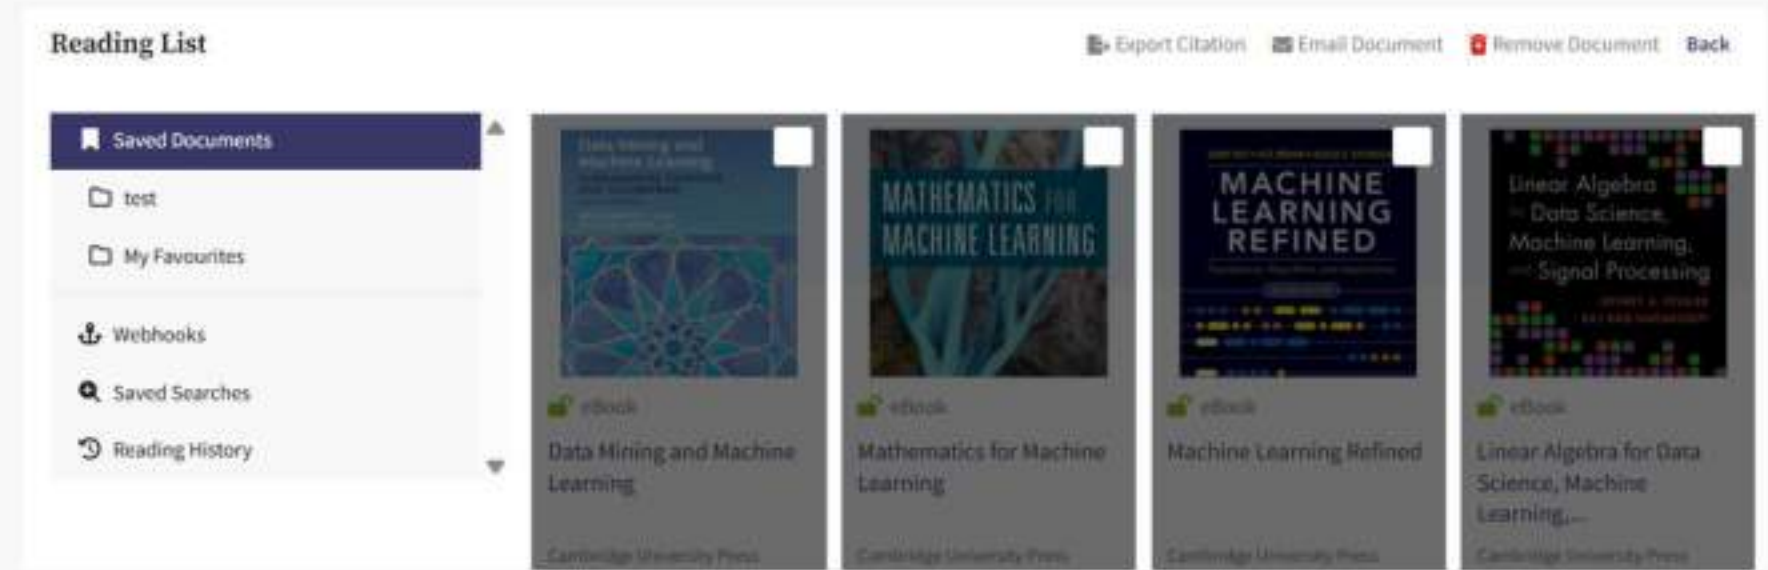

e) Once added to reading list, you can do a lot with saved eResources. Click the Button 'Select Document' to select multiple documents and:

f) Email Links to Peers

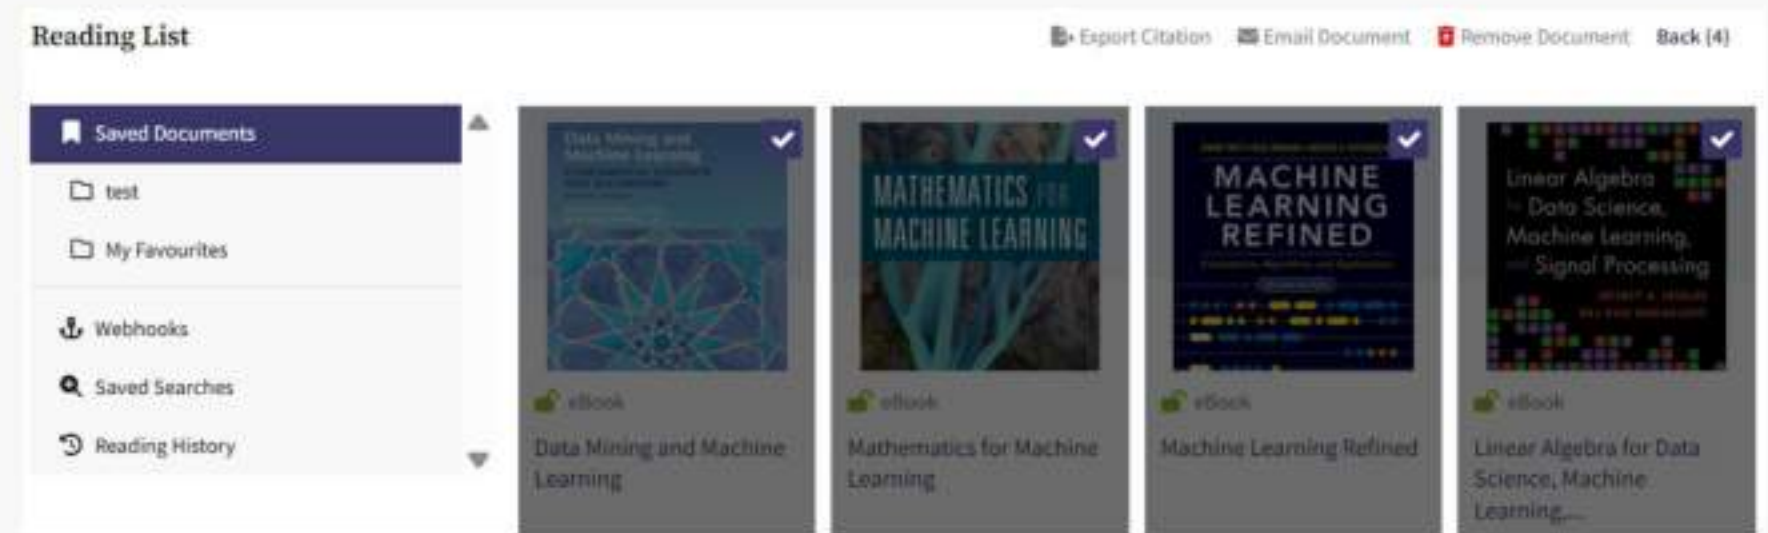

g) Download Citation in many formats including:

- APA Format
- MLA Format
- Chicago Format

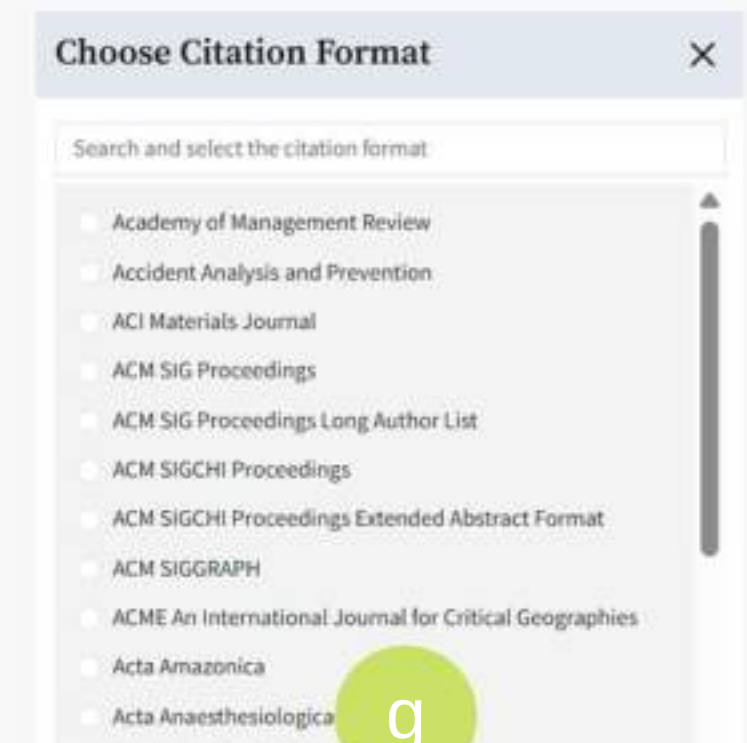

h) You can Delete selected documents from the reading list

e

f

Personalization Features

Reading List Folders

Webhook

Webhook

The eLibrary also allows you to save external links in your reading list. You can save anything you find relevant on web directly to your eLibrary Reading List.

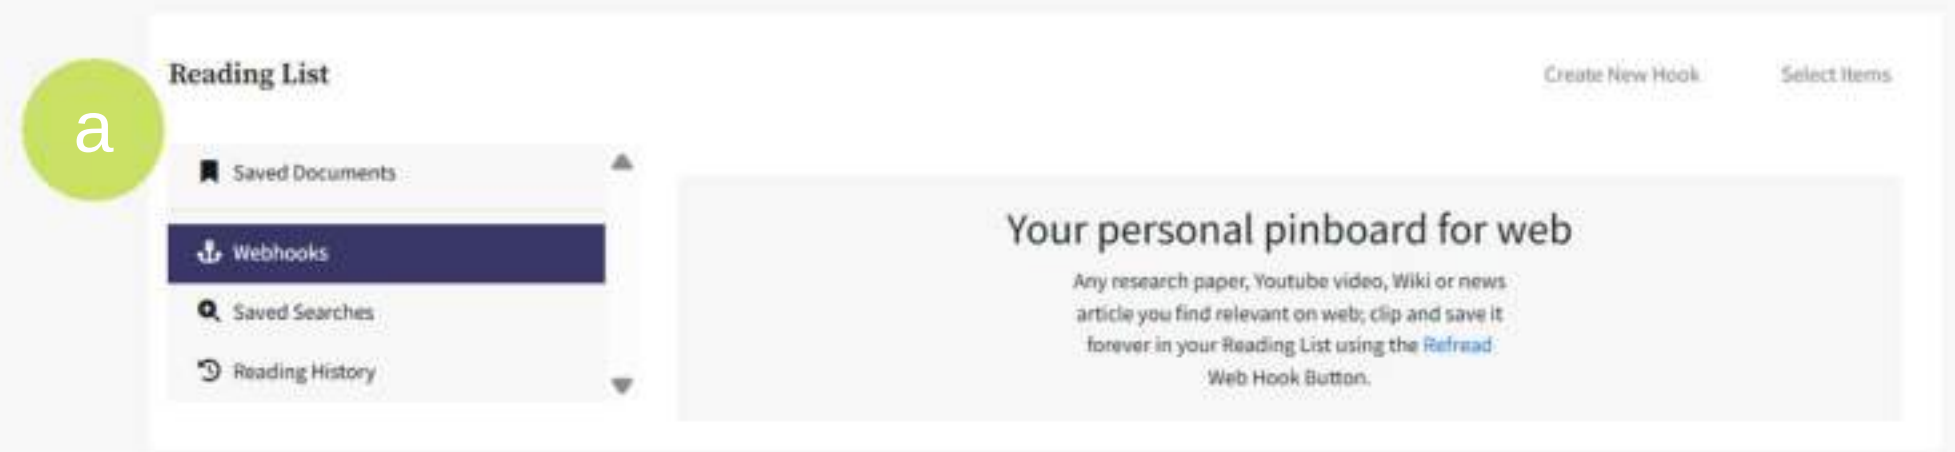

a) Click on the Webhook button

b) Just paste the URL of the page you wish to save to Reading list and click 'Get Data'

c) The Webhook will fetch all the page metadata automatically that can be saved for future reference.

d) You can also simplify the process by installing the 'Webhook' Extension on Chrome at:
<https://chrome.google.com/webstore/detail/webhook/fijhbjdmlecdbdlchfbdlcancihkcabhh>

After Installing, you will need to link the extension with your account once. After that, you can add webpages directly to your account by simply clicking the Webhook button.

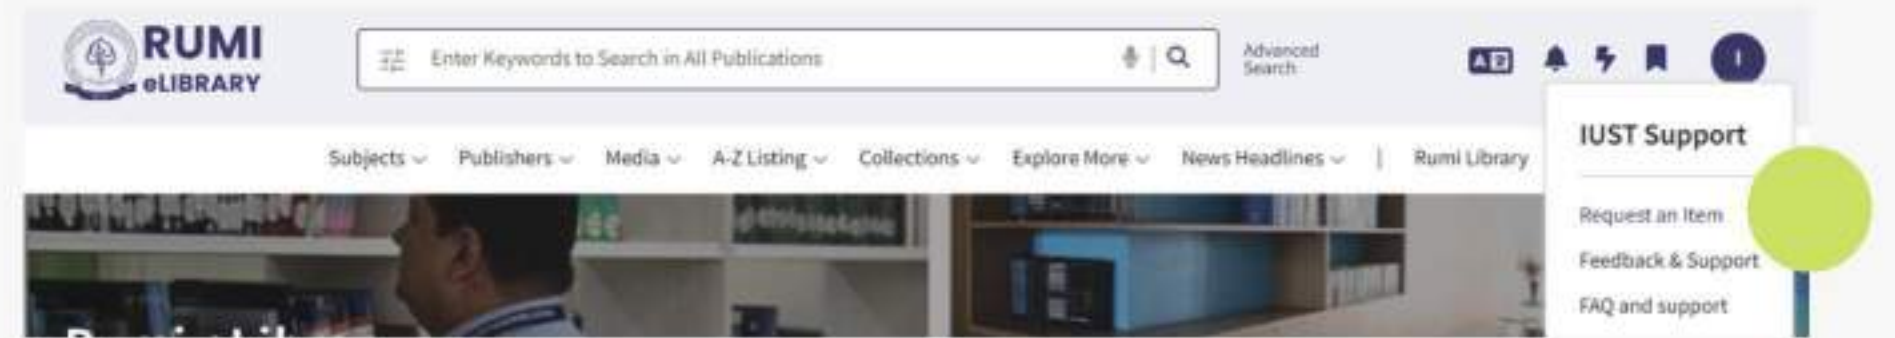

Support

Request an Item

a) If you are not able to find a resource or cannot access the full text, please fill the Request an Item Form. Available on click of 3 dots at top-right corner.

b) Mentioning Title and Author are mandatory. Also, you can fill this form only after Login.

The image shows a 'Request an Item' form with a title bar and a close button. The form contains several input fields: 'iustsupport@refread.com' (pre-filled), 'Title*', 'Author*', 'Name of publication (must for a journal article)', 'Publisher*', 'Year of publication*', 'Issn/isbn', 'A reference URL of the resource*', and 'Purpose (Research Requirement/Course Related/General Reading)*'. A green circle with the letter 'b' highlights the 'Name of publication' field. At the bottom right, there is a 'Send' button.

In case you have any feedback, suggestions or need a web demonstration of the platform, please feel free to write to us at support@refread.com
