IUST Mechanical Engineering Students Visit JSW Pulwama

Awantipora, Oct.10: The Department of Mechanical Engineering, Islamic University of Science & Technology (IUST), under their industry connect program, organized an industrial visit to JSW Pulwama for students of Mechanical Engineering and Robotics & Automation. The visit aimed to bridge the gap between academic learning and industrial practice by providing students first-hand exposure to modern manufacturing processes and plant operations.

Besides gaining firsthand exposure to modern manufacturing processes and understanding industrial operations, it was an inspiration for the students to meet IUST alumni at the JSW plant, who are leading key operations.
