Awantipora, April 24, 2026: The Department of Civil Engineering, Islamic University of Science & Technology (IUST), conducted an Alumni Outreach Programme (Batch-wise Online Interaction) for 4th Semester B.Tech Civil Engineering students.

The programme aimed to strengthen alumni-student engagement and provide guidance on higher education and career pathways.

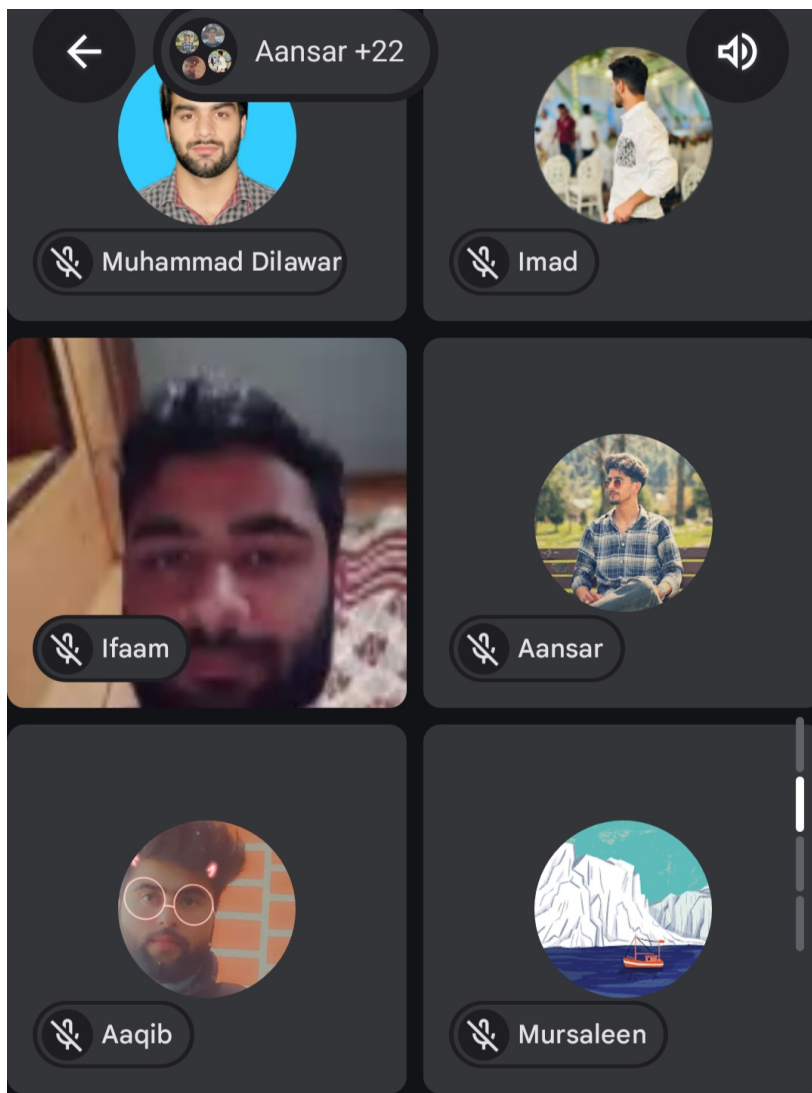

Session Overview

The session was delivered by **Mr. Abdul Waris**, an alumnus of the department and currently a Ph.D. Research Scholar at IIT Hyderabad. He shared his academic journey, research exposure, and insights into higher education at premier institutions.

Student Interaction

The session included an interactive segment where students actively engaged with the speaker. Key discussion areas included:

- Preparation strategies for postgraduate studies
- Research opportunities and domains
- Career planning after undergraduate studies

Outcome

The programme provided valuable academic exposure and helped students gain clarity regarding higher education pathways and research careers. It also strengthened alumni engagement within the department.
