An outreach Program Students Govt Girls Higher Secondary School Qazigund Anantnag Visits CIED IUST Foundation.

An outreach program was held at CIED IUST Foundation in which students of Govt Girls He Sec School Qazigund Anantnag visited CIED IUST Foundation.

The Director CIED IUST Foundation Prof. Parvez A. Mir interacts with students and gives a brief introduction regarding the CIED Department. He discusses the goals of the outreach program, such as enhancing educational opportunities, providing career guidance, or addressing specific needs of the students. He also introduces students to the world of innovation and entrepreneurship, showcasing how these fields can offer diverse and exciting career opportunities. He also gives stress to conduct workshops and training sessions to develop essential skills such as problem-solving, creative thinking, and business planning.

The students visited computer science and engineering Lab at IUST aims to provide students with practical skills, inspire interest in technology and innovation, and highlight potential career paths within these dynamic fields. It serves as a critical component of their broader educational experience, equipping them with knowledge and experience that can significantly impact their future academic and professional pursuits.

The girl students also visited embedded systems and Robotics Lab at IUST aims to provide students with practical experience and a deeper understanding of these advanced technologies. By engaging with real-world applications and working directly with cutting-edge tools and projects, students gain valuable skills and inspiration that can influence their future academic and career choices. This experience helps bridge the gap between classroom learning and real-world technology, fostering enthusiasm and capability in fields that are crucial for the future of innovation and technology.

The visit was a resounding success, showcasing the foundation's dedication to empowering young women and supporting their educational aspirations.

The overall visit was designed to provide valuable insights, resources, and inspiration to girl students, helping them to envision and pursue careers in

innovation and entrepreneurship. By addressing these areas, the program aims to contribute to their personal and professional development, equipping them with the skills and knowledge needed to succeed in these dynamic fields.
